

Condorhibit CU/S 12

Lubrificant – Corrosion preventive for copper and copper alloys

Physical Chemical Properties

Physical State	: Clear liquid
Colour	: Light yellow
Density of 20°C	: 0,813 Kg/l
Kinematic viscosity at 40°C	: 1,75 cSt
Flash point	: > 61 °C
Pour point	: < - 15 °C

Characteristics

Condorhibit CU/S 12 is a lubricant - protective agent for copper and copper alloys, designed for the medium indoor storage, the product leaves a very light oily protective layer on the surfaces.

Condorhibit CU/S 12 formulation properties are: excellent affinity for the metal surface and very good wetting/spreading ability.

Condorhibit CU/S 12, moreover, is able to guarantee protection also to complex shaped surfaces thanks to the wetting and penetrating properties of its specific additives.

Condition of use

Condorhibit CU/S 12 must be used as supplied, without any dilution with solvents. Any dilution may compromise the product functionality.

Condorhibit CU/S 12 may be applied by spray and by immersion.

Store in closed original container at temperature between 5 and 30°C, avoid direct sunlight exposure.
