

Condorine MIX CM

Degreasing additive

Physical-Chemical Properties

Physical State	: Colorless liquid
pH all'1%	: 7.0
Chemical Composition	: Mixture of surfactants and wetting agents

Typical Application

Condorine MIX CM is a product that, added to all degreasers with dip, barrel or ultrasonics application, gives more wetting and detergent power. If pieces to be treated are very dirty, a small addition of MIX CM allows to get a perfect degreasing.

Characteristics

Product is totally harmless and compatible with any degreasers produced by Condoroil for dip, barrel and ultrasonics application

Application conditions

Concentration	: 1 - 3%
Temperature	: 40-60°C
Plants	: dip or spray
