

Condor Roll 4011

Complete lamination oil for yellow alloys

Physical chemical data

Appearance	: clear liquid
Color	: light yellow
Density 20 °C	: 0,860 g/cm ³
Viscosity 40 °C	: 7.0 ± 0.3 cSt
Flash point	: > 133 °C

Characteristics

Condor ROLL 4011 is a complete oil for for the lamination of yellow alloys coils, indicated for Sendzmir and reversible plants.

Condor ROLL 4011 is an highly refined hydrocarbon containing EP additives that improve the lamination process, reducing tolls wear.
